To Whom It May Concern:
Subject: Melissa McNally

It is my pleasure to write this letter of recommendation for Melissa McNally. I have worked with Melissa for over a decade now on a variety of national projects. Her dedication to our profession has been nothing short of exemplary. She is a leader in our field and someone who possesses infinite vision to make a difference in the field of prehospital care. Recently, she was a champion for a Flipped Classroom Project. She not only offered her expertise in Crew Resource Management but also was passionate about involving her institution in research to demonstrate its effectiveness. She is an advocate for a culture of safety, Mobile Integrated Health, and Crew Resource Management.

Currently Melissa is an active member of the membership committee serves as the assistant advocacy coordinator, as well as the membership coordinator for the State of Florida.

Melissa is a Nationally Registered Paramedic, National Registry Rep for the State of Florida, and a Board-Certified Emergency Medicine Physician Assistant.

As a proud member of the National Association of EMTs, I feel that our National Association would greatly benefit from her leadership at a national level.

If you have any questions about her qualifications, please feel free to contact me.

Sincerely,

David Page MS, NRP
Director, Prehospital Care Research Forum at UCLA
